5 2 children share 18 cards equally.

CHALLENGE

a) How many cards does each child get?

Each child gets ☐ cards.

b) One more child joins them.
They share the cards again.

Do they get more, fewer or the same number of cards?

_____

Reflect

I have 20 cherries to share between the cakes.

How many cherries go on each cake?

Explain how you would use cubes to work out the answer.
